Future of Textile

KOREA JACQUARD
Textile Institute

인테리어섬유를 선도하는 한국자카드섬유연구소

Thank you for visiting 'Korea Jacquard Textile Institute'.

I. Research & Development

- Identification, execution and management of research assignments
- R&D for joint academic-industry-research project
- R&D for new technology and material development

II. Trial product (sample) development

- Customized fabric development according to need
- Weaving design techniques and usage development
- A database of Fabric design analysis and development

III. Support for dyeing

- Development of all types of special dyeing methods
- Functional processing support
- Technical consultation on the dyeing methods

IV. Test analysis

- Advanced sample analysis and evaluation
- Test to identify root causes to resolve difficult technical issues
- New product development and technology certification/pattern support
- Technical support for solving defect related issues and to improve quality

V. Design development

- Diversification of products developed at companies by supporting production of trial design products
- Support for customized product design and pattern development
- Providing information on fashion trend, and colors and materials in fashion for different seasons
- Design consultation for small and medium sized companies' product development

VI. Human resource cultivation

- Basic training to unemployed people to support employment
- Training for employment for multicultural families
- Support for training conducted to increase resident's cultural life
- Cultivation of designers, research and technological professionals and other professionals
- On the job training for unemployed college/university students.
- Training to adapt to the field, and training for the working level people
